

Survey Probes in Our Solar System

3-4 short paragraphs about your probe, in the style of press release that covers these questions:

1. Where is the platform currently located in space?
2. When was the platform launched and what is its mission timespan?
3. What type of instrumentation does the platform house?
4. Who constructed it? (i.e. university, observatory, laboratory, museum)?
5. Why was it built? (look at the type of technology employed and discuss how it overcame limitations of previous platforms)

Actual Image of Probe

Caption goes here.

Schematic of Probe with major parts identified, such as (computer core, communication device, sensors for collecting data, etc.)
